Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Applicant initiated interview for advancement of prosecution. Examiner noted and reported extreme/undue breadth of claimed invention and suggested specific areas of limitation clarification/elaboration for prosecution advancement. Among these areas discussed were description of receiving scheduler threads (functionality is seemingly required for invention operation) as described in Pages 29-30 of the specification (highest attention recommended in this section of the specification), determination specifics of active/completed information flows from process/thread to port assignment(s) and polling of ports and/or threads for same, explicit definitions of art specific words in use (e.g., process, thread, port, etc.), and header/lookup table usage. Commensurate TITLE and claimed invention was also suggested, including potential misspelled words in TITLE (possible typo). Applicant reported intended RCE filing with associated claim amendment requirement.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
